

What is MyAcademicID?

Student Mobility use-case

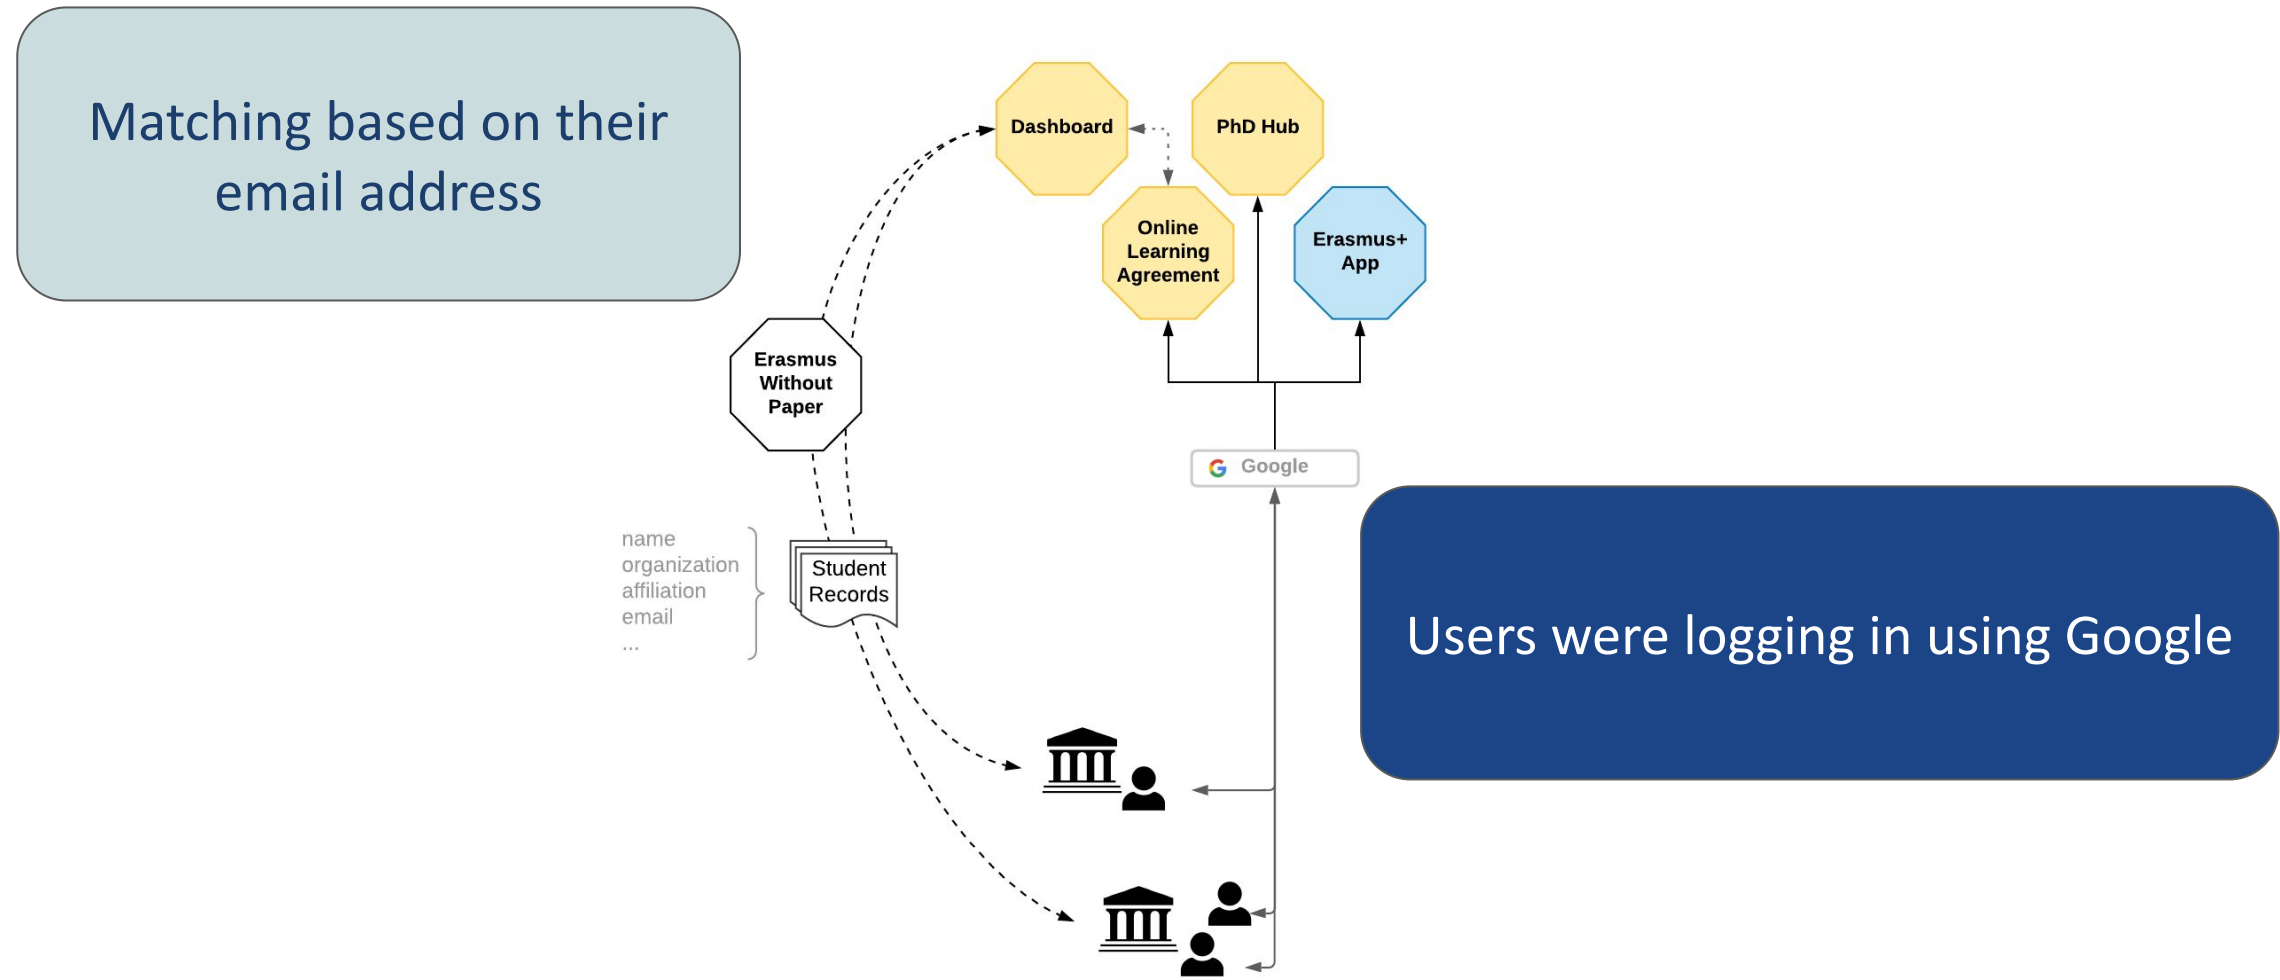

Student mobility requires knowing both **who a person** is and what **their home university** is

Universities need to exchange students' records
Students must be uniquely identified

Digitalisation of the Erasmus+ requires a cross-border identity management to transport academic attributes

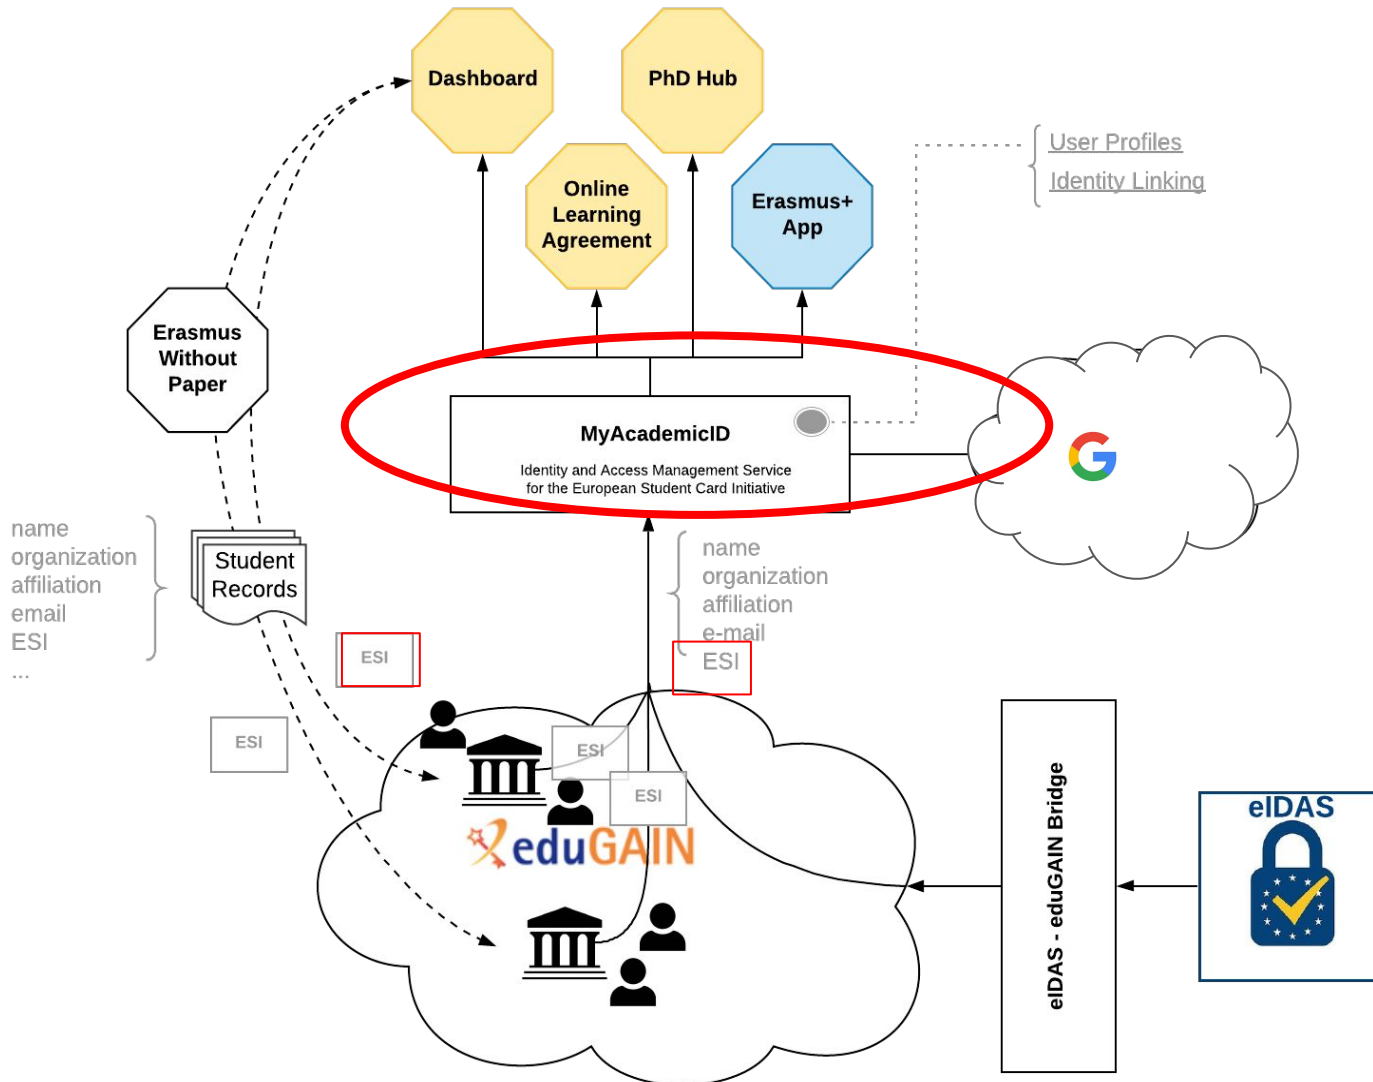

Before MyAcademicID

Outlining	Outlining Student Mobility related use cases
Agreeing	Agreeing the way to uniquely identify students when they move from A to B and student records need to be transferred (ESI)
Designing	Designing an architecture to enable a single interface for authenticating students
Building	Building a first bridge with the citizen eID eIDAS and eduGAIN
Implementing	Implementing the authentication interface as defined in the architecture on some of the use cases

MyAcademicID Identity Access Management Platform

- Single Sign On solution for the services enabling Erasmus+ and Student mobility
- Central point to manage identity and access management for all the connected services
- Leverages the academic attributes from HEIs through eduGAIN and the national eID through eIDAS
- Backwards compatible with support for Google logins
- Ability to support more login methods (e.g. EU Login)

MyAID IAM: key facts

 Enable to support a very important and large use-case

 MyAID IAM launched in Nov 2020

 MyAID IAM operated by GÉANT

 Platform as a service

 Leverages eduGAIN and eIDAS

Launched 1Y Ago
