

Nominations

What is it?

- inform your partner - **who** you would like to send them
 - IIA plays key role in **numbers, subject field, dates and services**
- HEIs: own process for handling incoming nominations, oftenly via a tool

Ways of nomination - as of now

- Email with text in the email
- Email with data attached (in pdf, excel, word in a template of the partner etc..)
- Via a tool-where is the link, my credentials are not working, partner coordinator does not answer my questions
- Via phone, whatsapp, messenger...
- I have no idea, and I have 900 students to nominate...

Nomination- how to unify/generalise this?

- Challenging indeed - asked many universities and coordinators
- Nomination API ready - testing phase

Nominations & EWP

What it does cater for

- Automatic & straightforward nomination process for all HEIs
- Nomination requirements at institutional level

What it does not cater for

- Institution-specific nomination process where partner needs to login to your system for nominating students
- Nomination requirements at faculty/school level

**Between which steps in the mobility flow, you will find nomination?
(student perspective)**

① Start presenting to display the poll results on this slide.
